Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Election/Restrictions***

The applicant seems to have elected without traverse since the non elected claims were withdrawn. The applicant in the election said that he elect with traverse. The Examiner will consider this to be an error since the applicant has withdrawn the non elected claims and has not submitted arguments as to why the restriction was incorrect. Therefore, the Examiner will consider the election is without traverse.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wright in view of Mendham.

Wright discloses a blade member having a first and second outer skin with wall thickness that changes and a central portion that is thicker than the leading and trailing edge, reinforcing areas, and the blade member being made out of an alloy (see column 1, line 67 and all of the figures). However, Wright is silent on the outer skins and reinforcing area being formed by wire electrical discharge-machining. However, Mendham discloses an aircraft part being formed by wire electrical discharge-machining is well known in the art.

Art Unit: 3644

It would have been obvious to one skilled in the art to have made the Wright's blade system by using wire electrical discharge-machining as taught by Mendham to create a stronger and more efficient blade.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wright as modified by Mendham as applied to claim 1 above, and further in view of Camping et al.

Wright as modified by Mendham discloses all claimed parts except for the substantially flat second outer skin. Camping et al teaches that a substantially flat second outer skin (see figure 4) is well known in the art.

It would have been obvious to one skilled in the art to have made the Wright's blade second outer skin substantially flat as taught by Camping et al to increase lift.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Liedholm, Wallace et al, Clark, Platt et al, Rees et al, and Le Compte disclose blade means.
